

What is claimed is:

1, A creation system of melody and image synchronous information comprising event information insertion means for inserting event information in melody information at timing of image renewal in matching with said melody, for reproduction of images in synchronization with melody.

2. A melody and image synchronous generation system comprising:

melody generation means for generating melody based on melody information;

event information detection means for detecting event information inserted in the melody information; and

image generation means for generating images at timing of respective detections of the event information by the event information detection means on the basis of image information.

3. A melody and image synchronous generation system according to claim 2, further comprising image timing control means for controlling timing of image generation at the image generation means on the basis of the event information detected by the event information detection means

4. A melody and image synchronous generation system according to claim 2 or 3, further comprising receiving means incorporating storage means for storing the melody information and the image information as received.
